

Matias Bøe Olsen

Underwriting Considerations for the Carbon Transition of Vessel Operations

Matias Bøe Olsen, Senior Executive, Underwriter and Decarbonisation Coordinator in Skuld. He heads up Skuld's decarbonisation efforts and is responsible for Poseidon Principles for Marine Insurance (PPMI) reporting in Skuld. He also sits on the steering committee in PPMI on behalf of Skuld. Furthermore, he is representing Skuld in the Green Shipping Program and Mærsk Mc-Kinney Møller Center for Zero Carbon Shipping. He holds a Master of Science degree in Marine Technology, specializing in ship design and optimization. His core focus is on Skuld's Scope 3 decarbonisation commitments and its affect on underwriting decisions. Matias brings in an extensive overview of shipping efforts towards net-zero in 2050 including regulations, energy transition, new technologies and risk.
